Second level heading

You can force a newpage anywhere using the LaTeX shortcode `\newpage`.

References

References will be automatically placed at the end of a document (I suggest including a heading for them still), or you can control their placement anywhere in the document using a fenced div with the id `#refs`:

```
:::{#refs}
:::
```

Example references

Answers to questions

Marked with a `Questions` fenced div to match colouring, but the question/answer linking should work outside a fenced div too.

A1. My answer here.

A2. Second answer here.
